# blue phone

Welcome to Bluephone, the smartest way to stay in touch with the people who matter, when it matters. Family, Friends and Services are now contactable whenever you need them.

## Smart and Simple

BluePhone is not just a phone, it's the world's leading home communications system with over 100 special features that can remind you of important tasks, helps you stay in contact with the people you need even when you can't reach the phone and can even help monitor the safety of your home.

## Daily OK!

No news is now good news. The Daily OK feature can be programmed to prompt the user to respond to the phone's 'activity confirmation' everyday by pressing the Daily OK button when an audible voice prompts them. Family and friends can now enjoy peace of mind, knowing that they will only be contacted by the Bluephone if their loved one raises the alarm or is inactive

The Family and Friends Photo Keys can be programmed to contact up to 8 of your family and friends, all at the press of a single button.

The function keys allow you to store additional numbers into memory, adjust the volume, one touch redial and much, much more.

## BluePhone even talks to you.

BluePhone can be programmed to provide timely reminders for everyday tasks such as meal times and taking medication. It will even tell you the time and what day it is, and if you've left the phone off the hook!

## Blue remote pendant

The optional Blue Remote pendant enables you to activate the Assist function even when you can't reach the phone. With BluePhone's ultra sensitive in-built microphone, you can make contact even when you are up to 80 metres away from the phone itself.

By simply pressing the Assist Button you have direct one touch access to up to 8 preset numbers. If activated BluePhone will continue calling these numbers until voice contact is made.

BluePhone provides a hearing aid induction loop, a two way speaker phone, battery back up in case of power failure and adjustable ringtone and handset volume.

## Much more than just a phone

BluePhone can connect with a wide range of home safety and communication devices, making it a total home communications system. It can also link with professional monitoring services, offering real peace of mind and security.

## Home & away

The BluePhone can be easily connected to other compatible home safety devices such as smoke detectors and intruder alarms, sending out an assist call if it detects any problems.

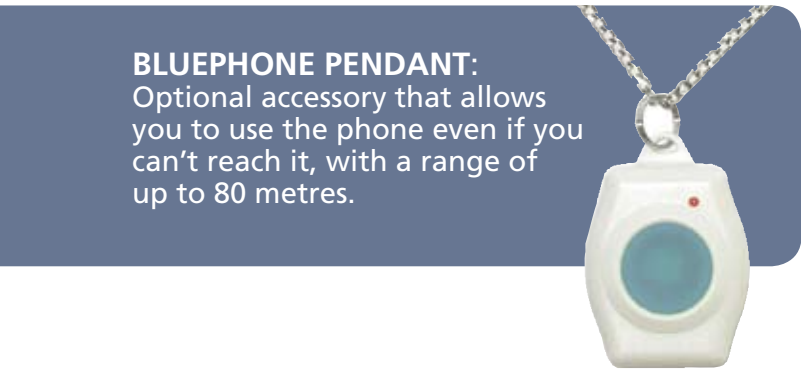

**DAILY OK:** Family & friends can now enjoy peace of mind knowing BluePhone will contact them if their loved one raises the alarm or is inactive.

**ASSIST:** Direct one touch access to up to 8 preset numbers. If activated BluePhone will continue calling these numbers until contact is made.

**DIRECT DIAL:** One touch direct access to your choice of family, friends and services - and all can be personalised with photos.

**FUNCTION KEYS:** Allows you to store additional numbers, adjust the volume, one touch redial and much, much more.

- OTHER FEATURES:**
- Large, easy to operate buttons
  - Talking clock
  - Voice alert tells you if the handset is off the hook, line is disconnected or the pendant battery running low.
  - Programmable for a range of reminders including medication and meal times
  - Adjustable volume handset and ringtones
  - Hearing aid induction loop
  - Two way speaker phone
  - Approx. 100 hour battery backup
  - Remote programmable
  - Compatible with wireless smoke detectors and intruder alarms
  - Option to add professional monitoring
  - Wide range of optional BluePhone extras inc. BluePhone Pendant, Duress alarms and Smoke alarms

**BLUEPHONE PENDANT:**  
Optional accessory that allows you to use the phone even if you can't reach it, with a range of up to 80 metres.

BluePhone is proudly designed and developed in Australia by Smart Caller International, and already used by over 45,000 people nationwide.
